

Instructions

Print to label paper

Cut it out

Affix- use foamcore or matte board

Play games

Create games- use the included svg file to modify the hexpack into whatever you want it to be

Hexpack is an adaptation of piecepack.

Hexpack is a public domain game system

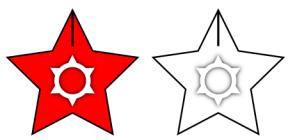

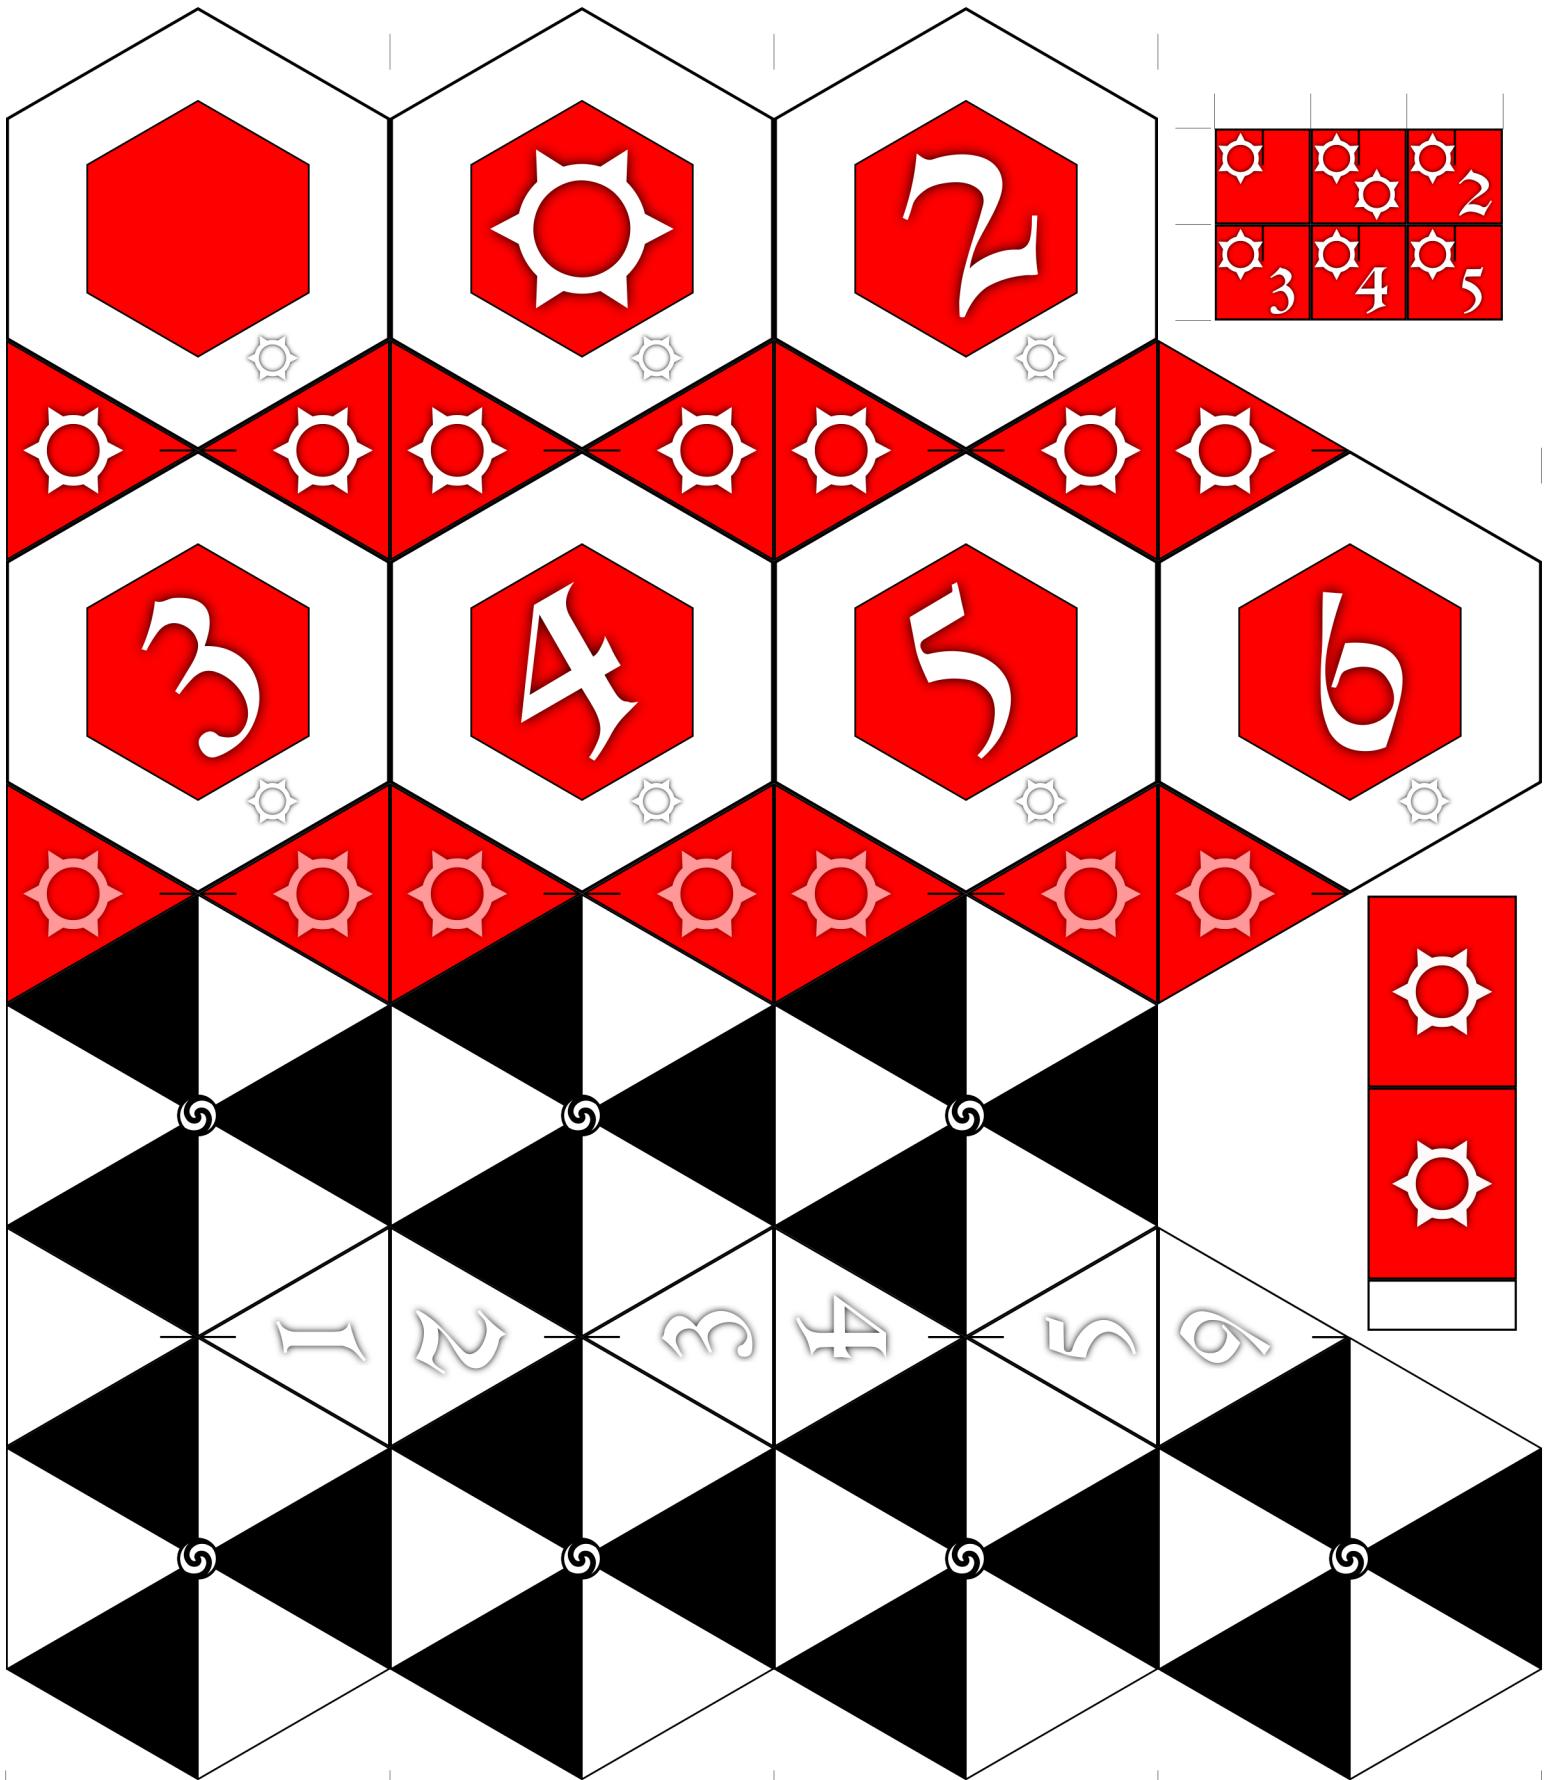

designed to encourage creative, open game development
and design.

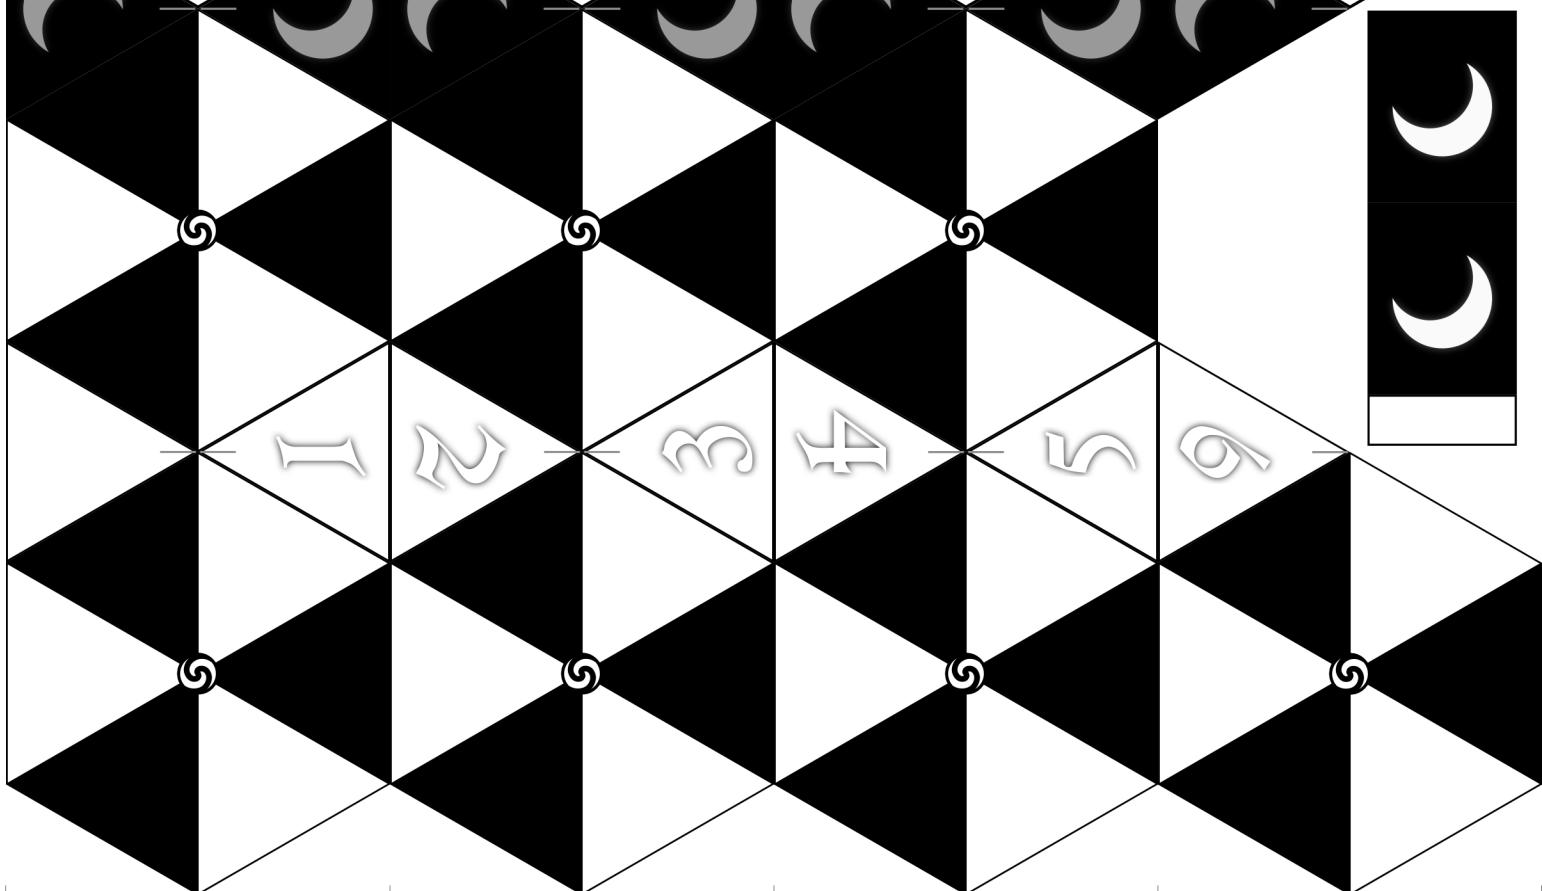

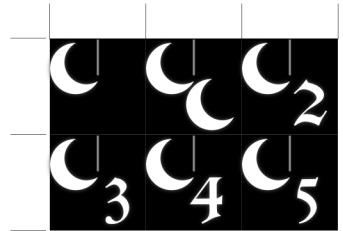

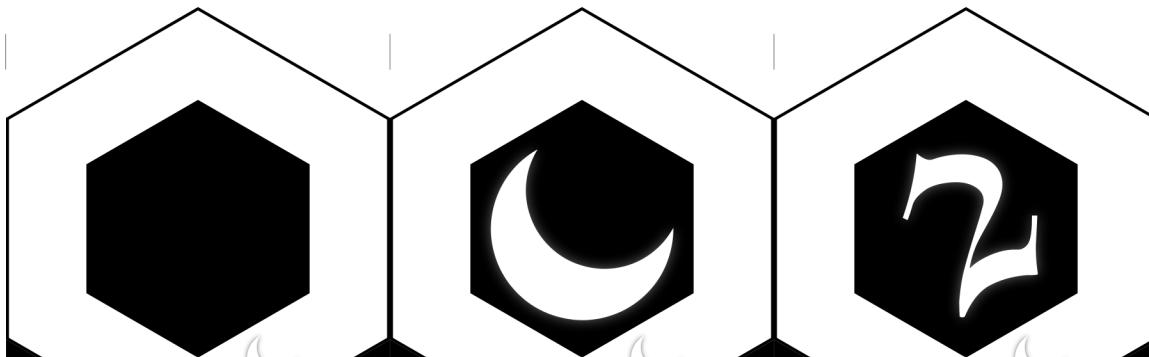

Hexpack concept is from Nathan Morse design by Daniel Wilcox

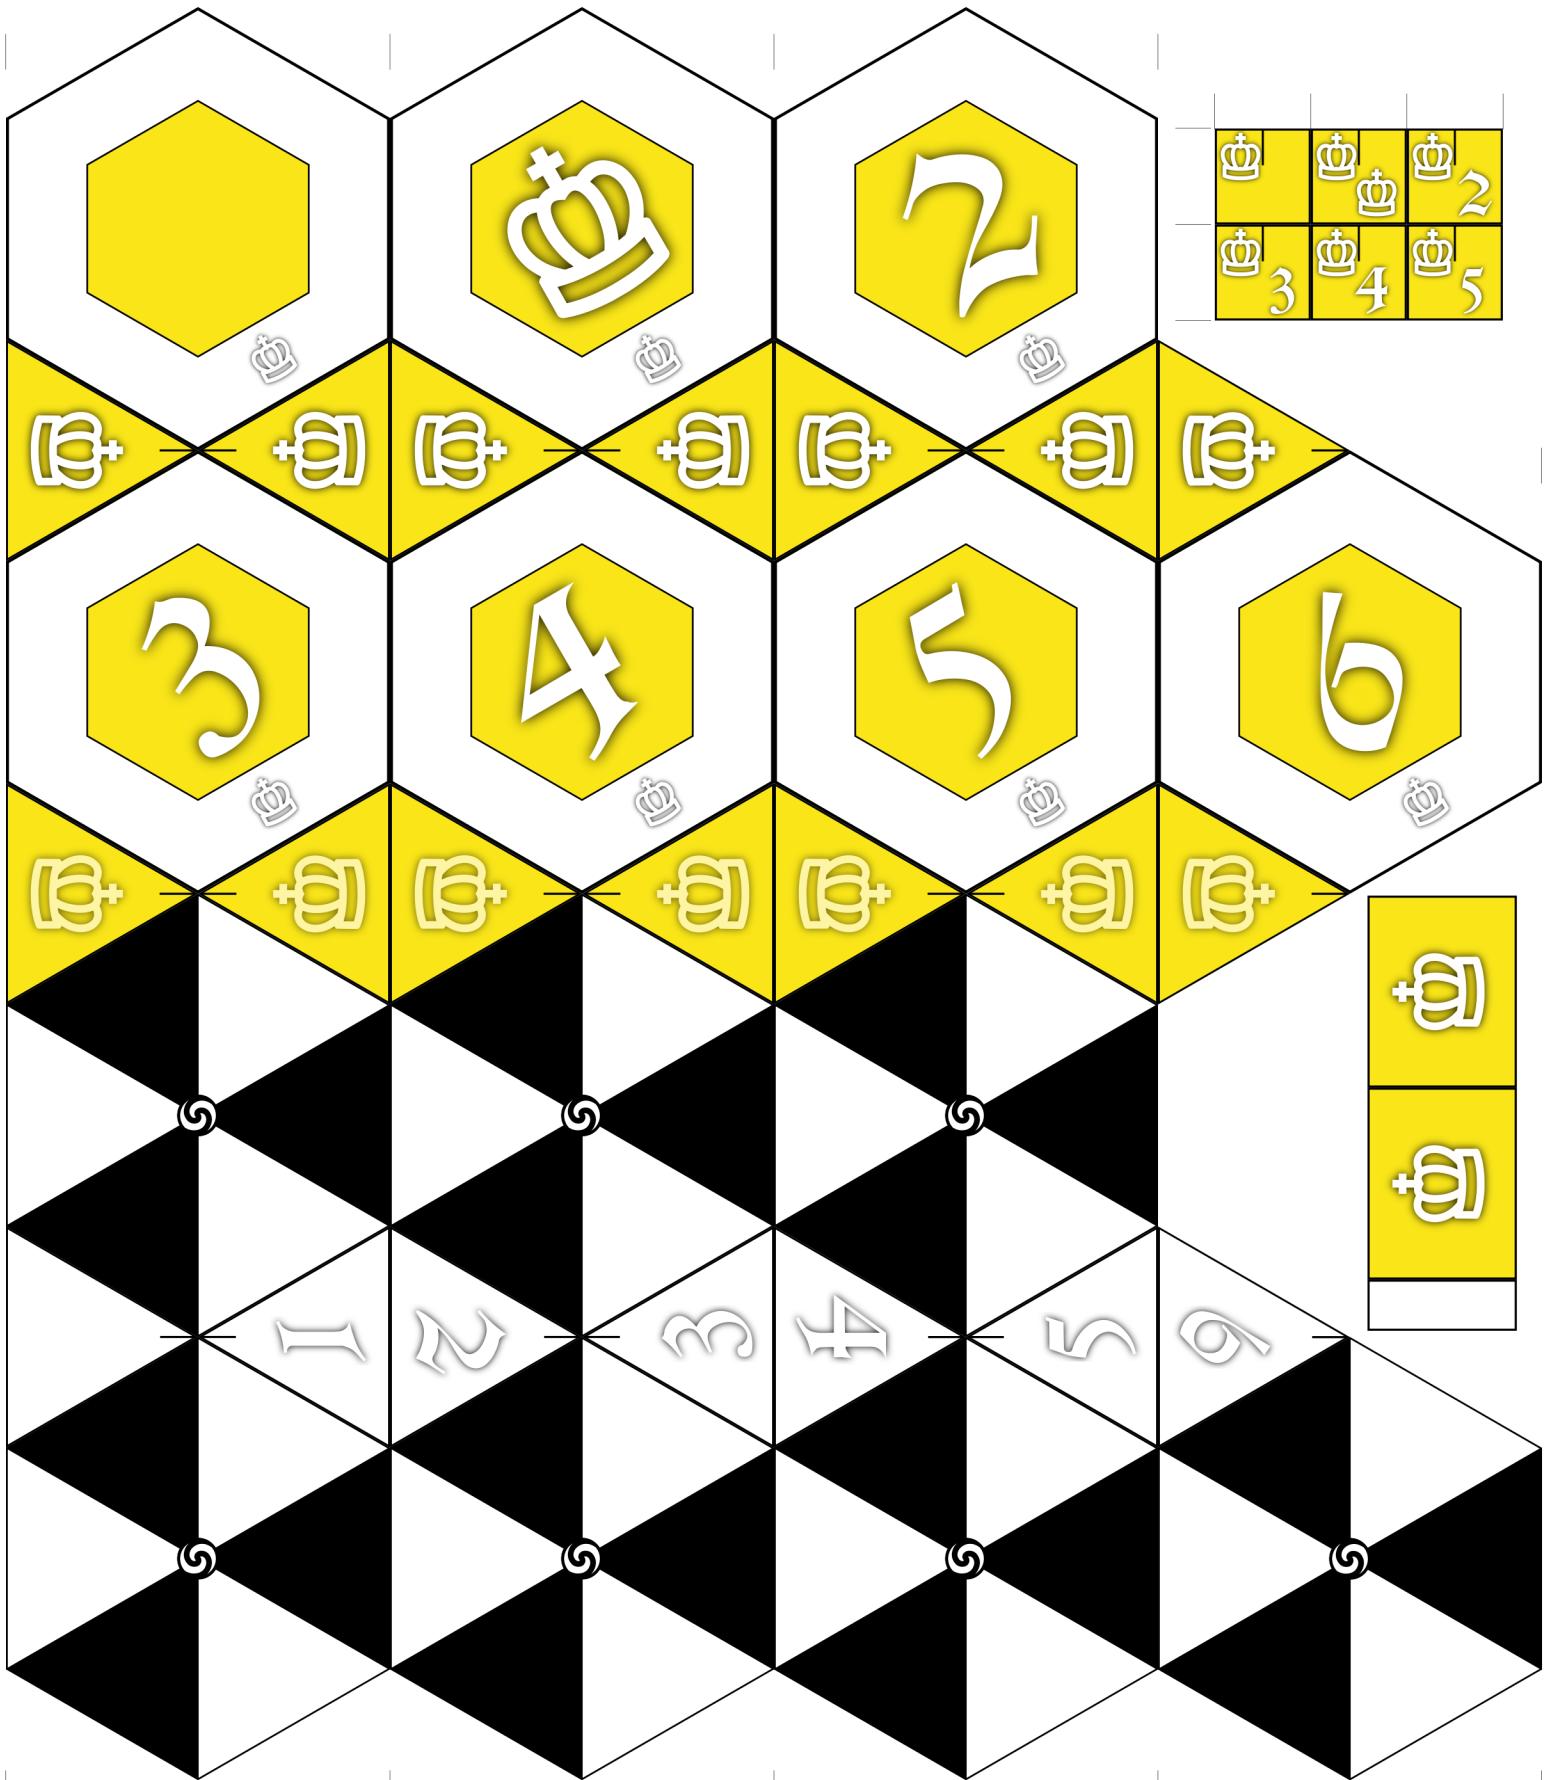

This version of the hexpack is made to resemble the JCD Piecepack

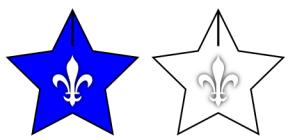

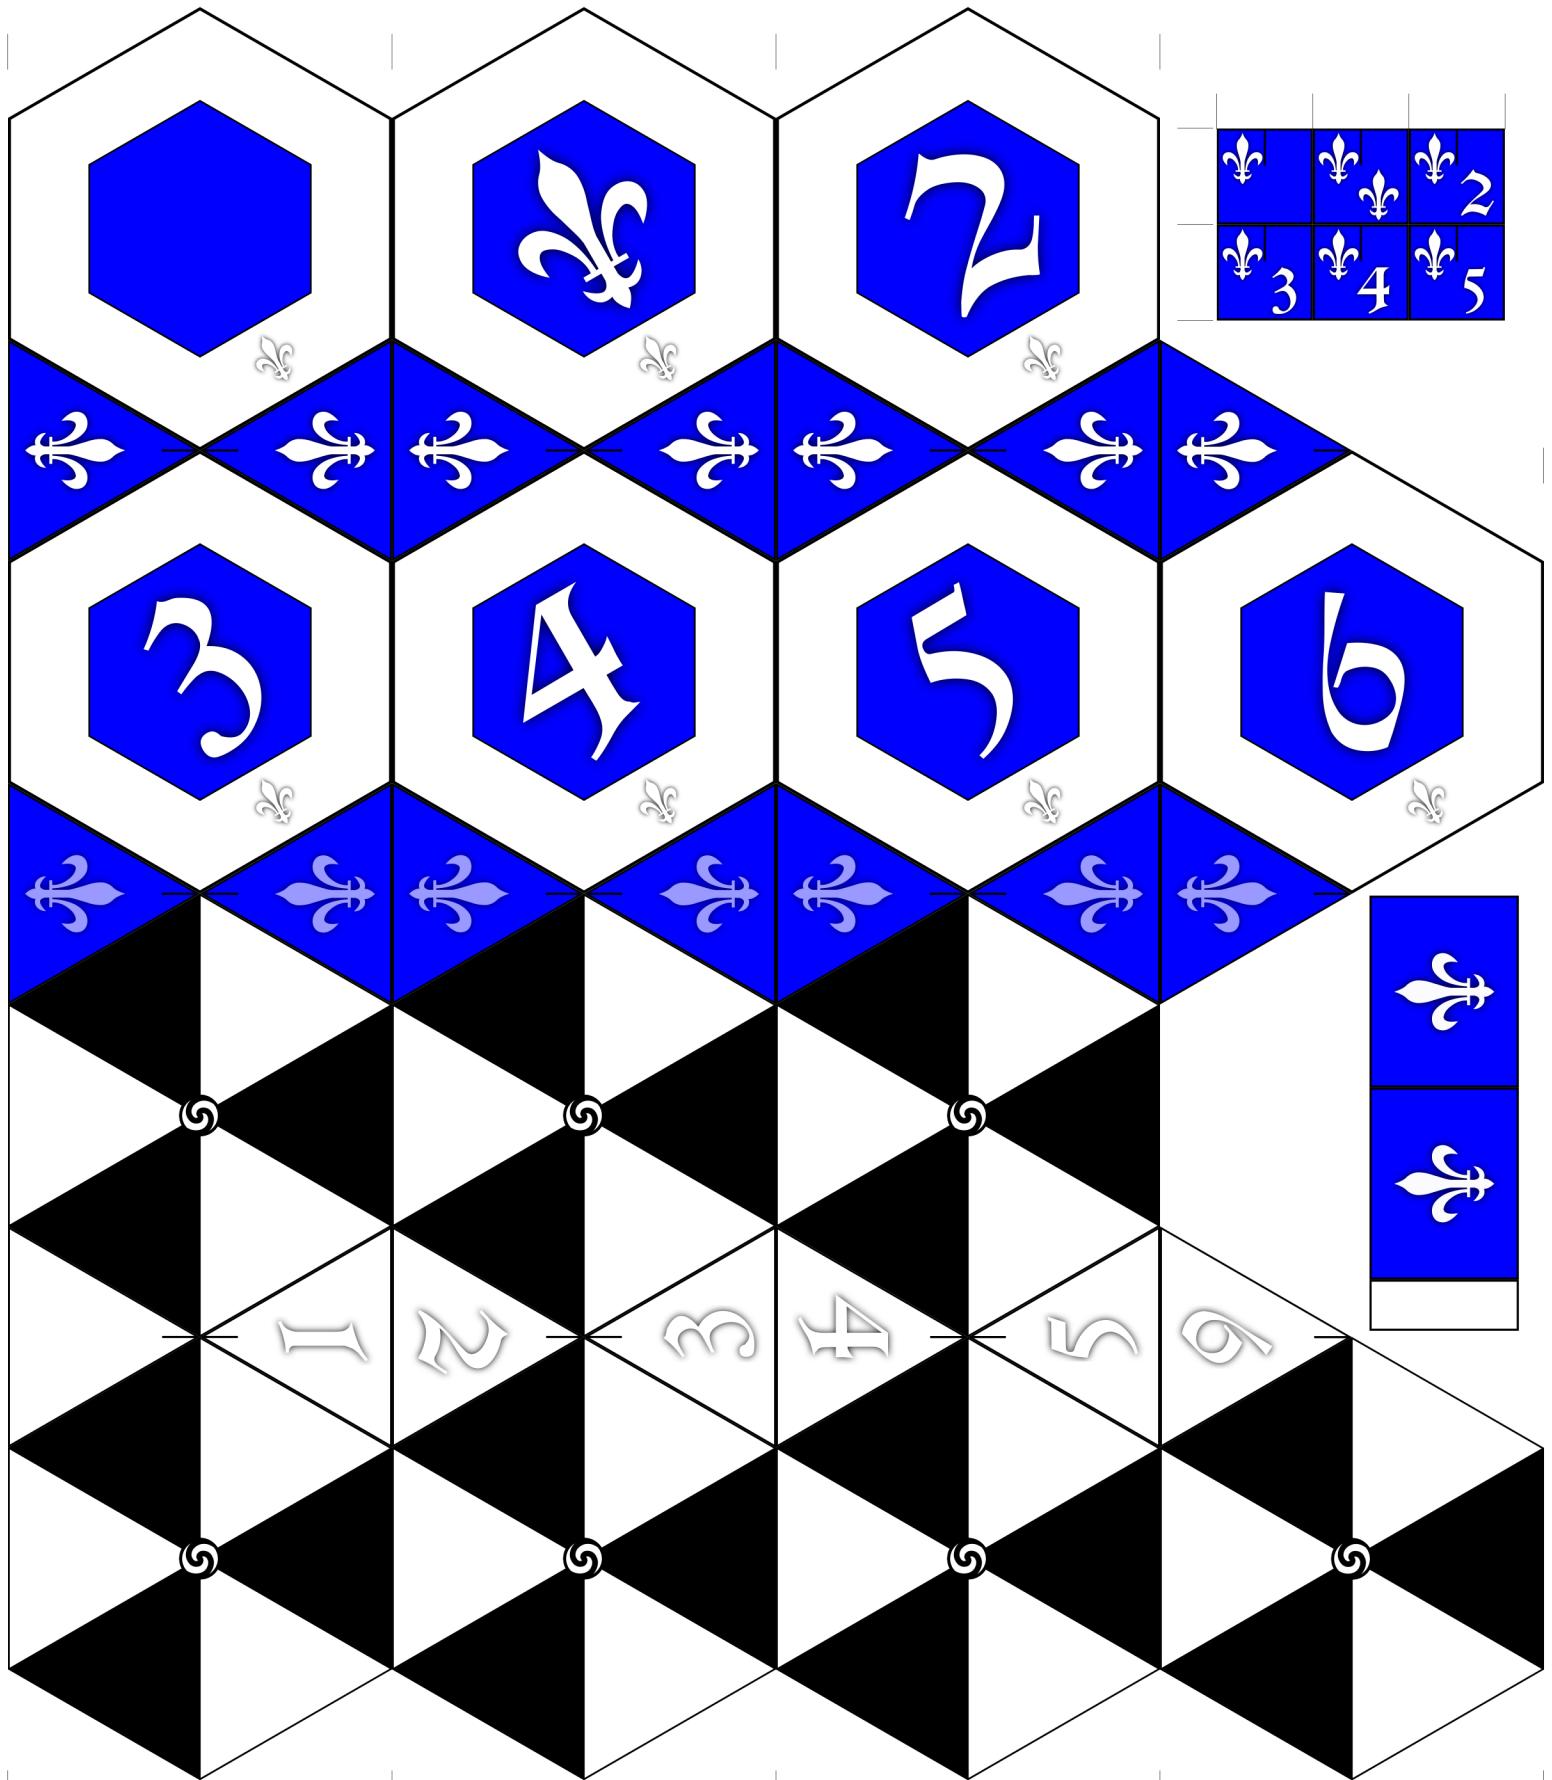

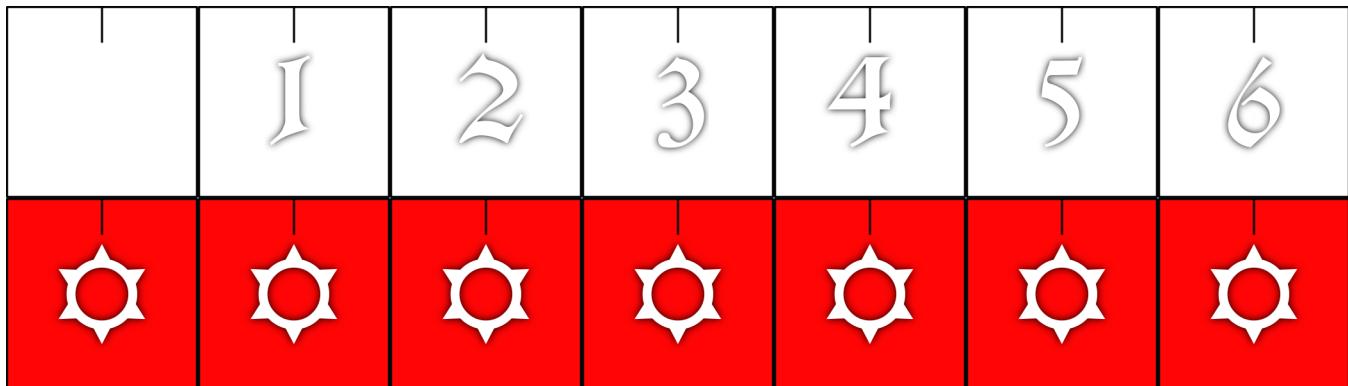

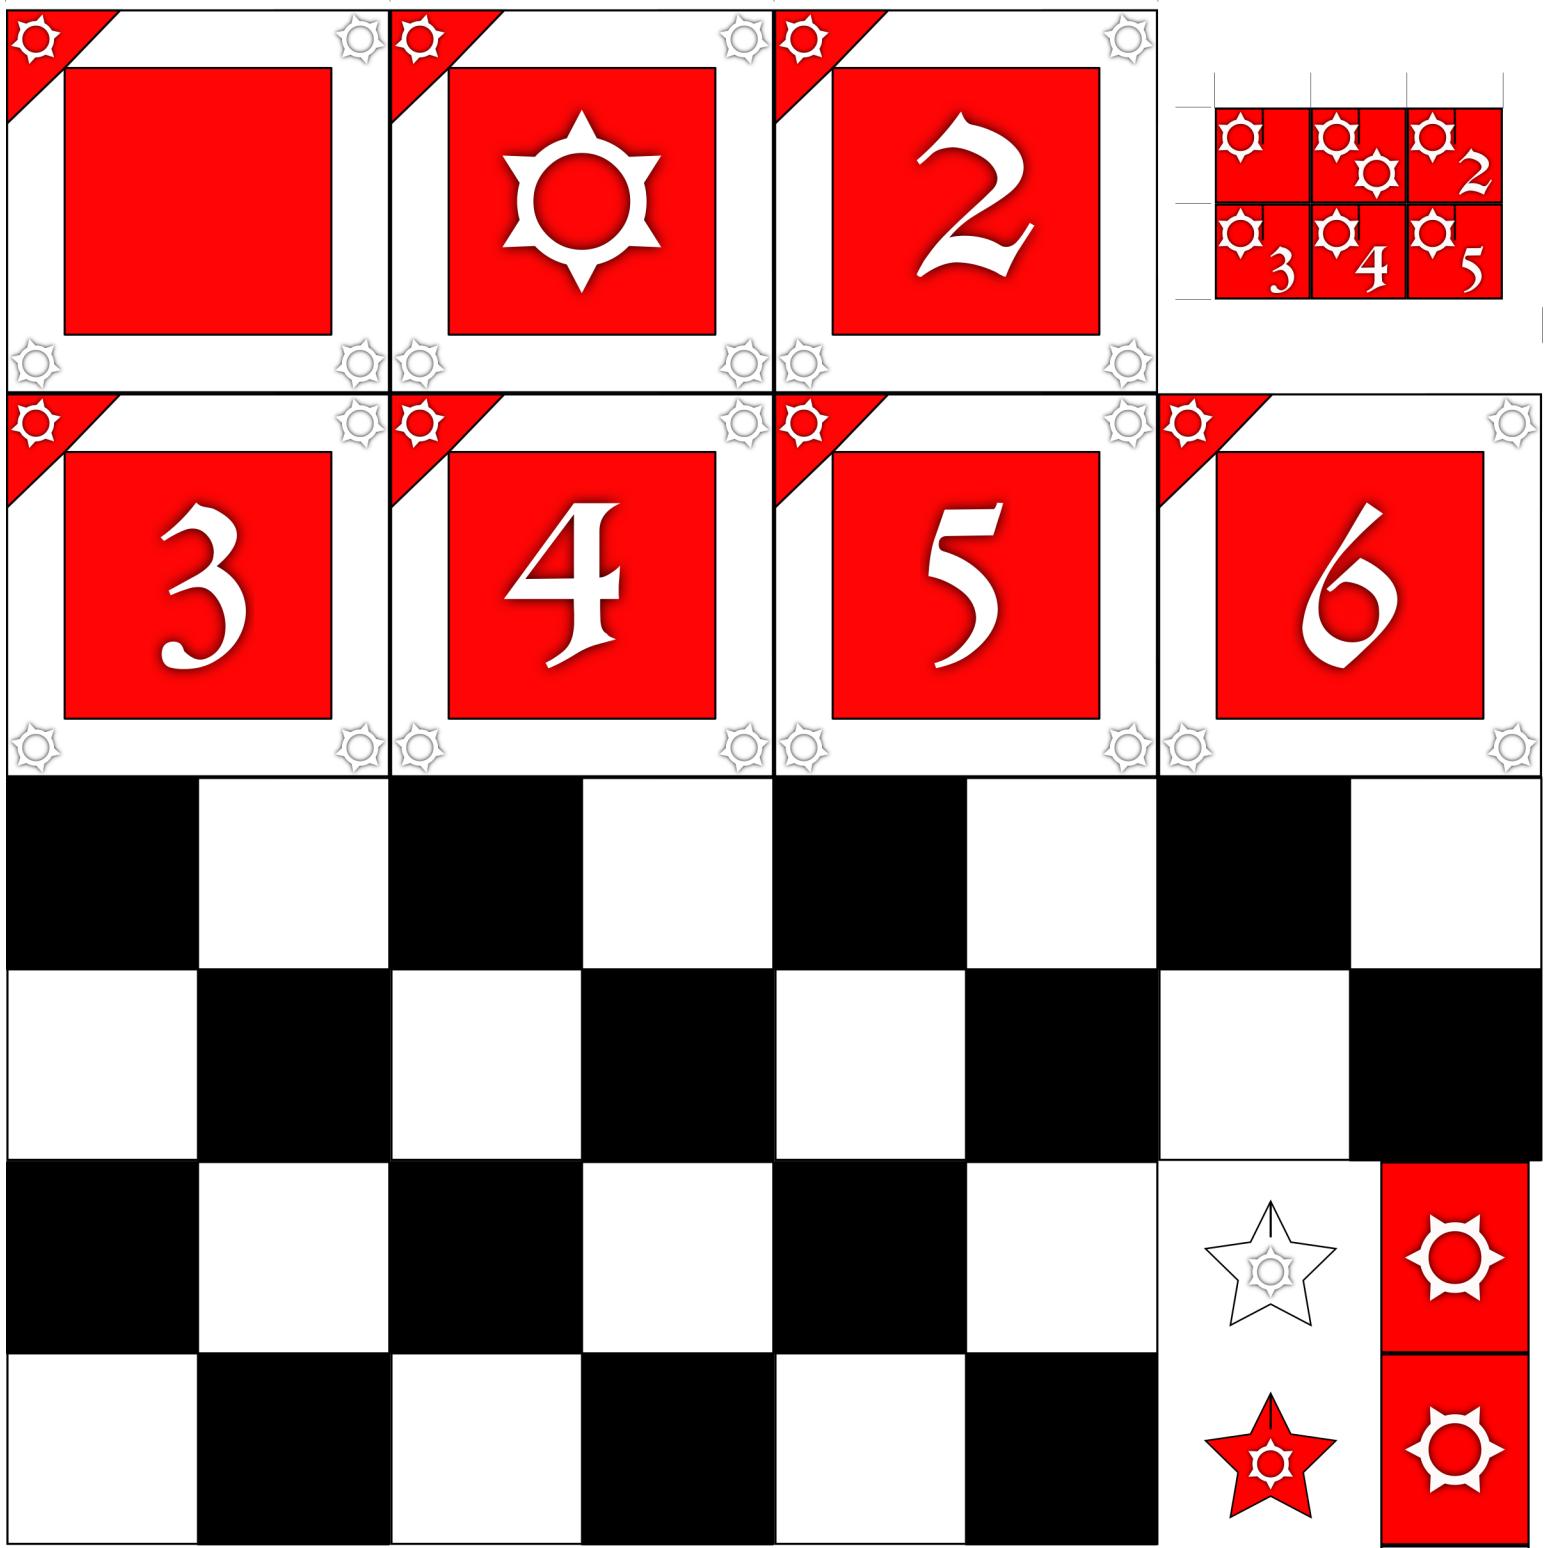

Mod it, Distribute it, Sell it
please just give us a little credit

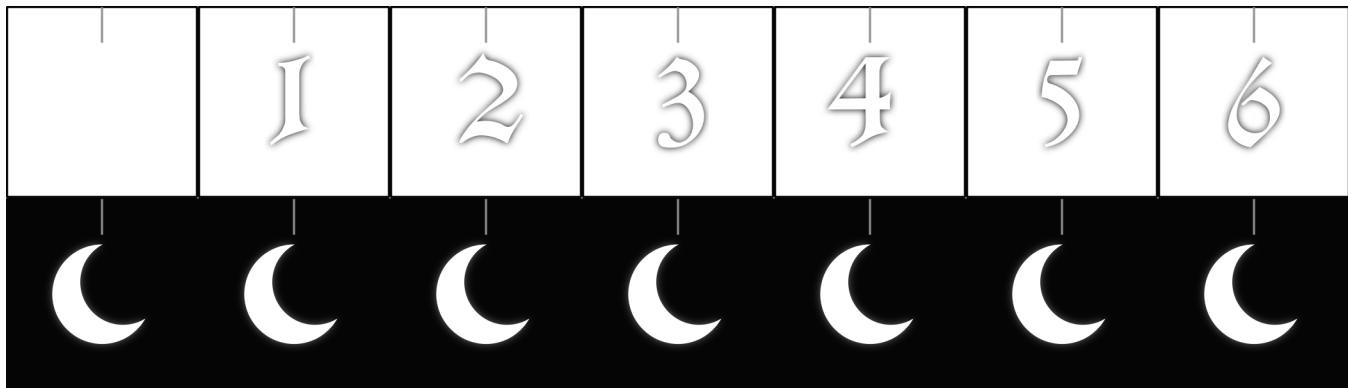

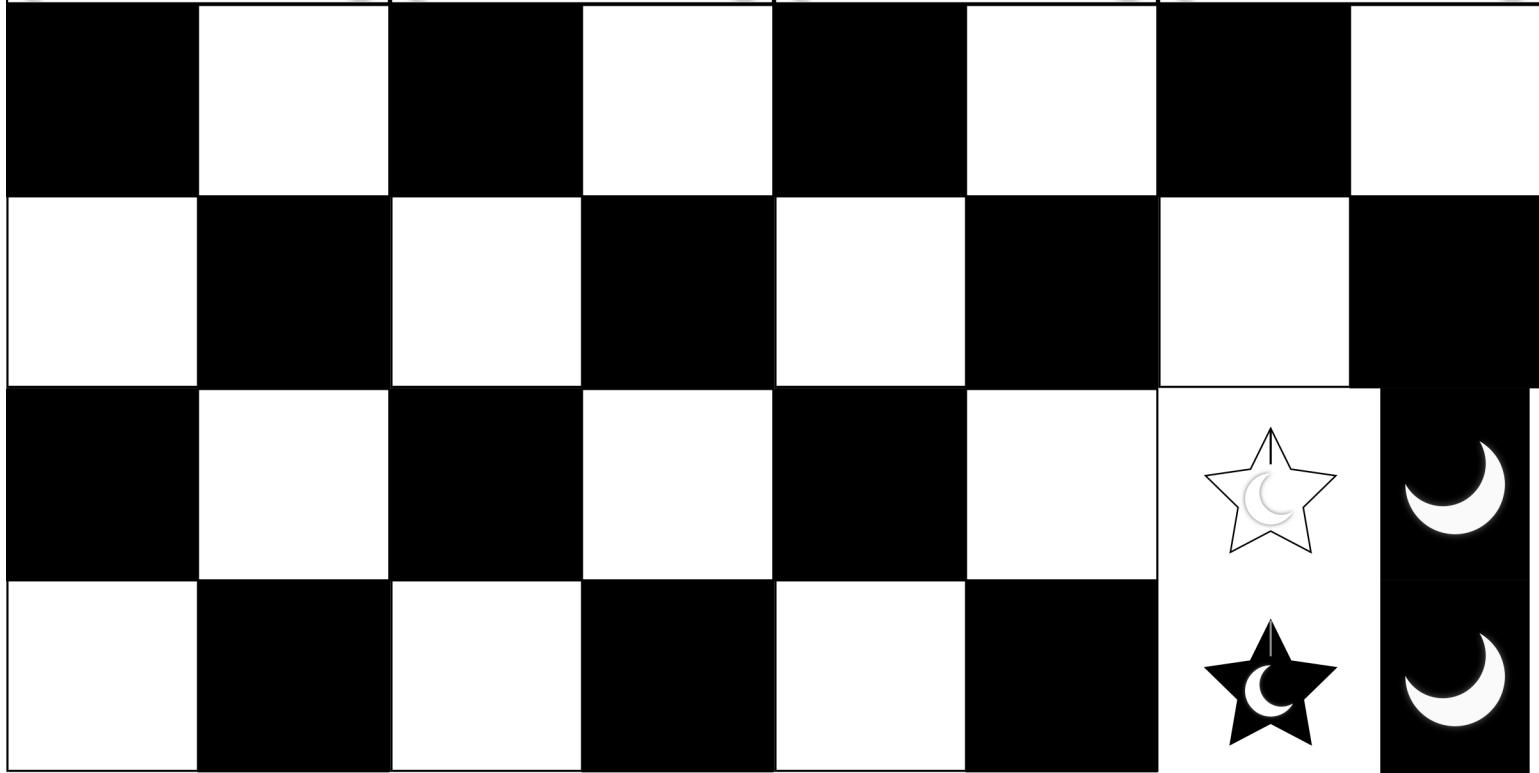

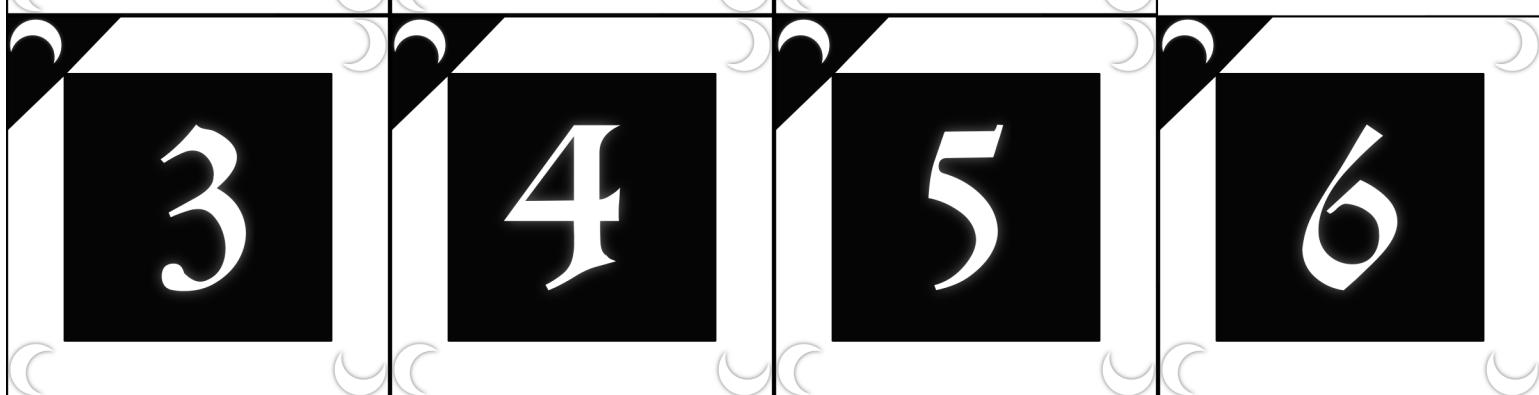

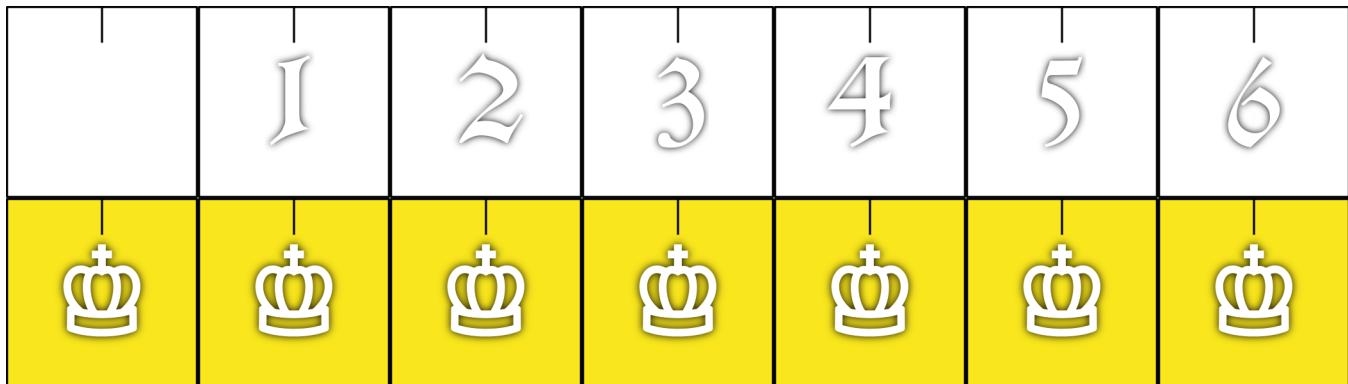

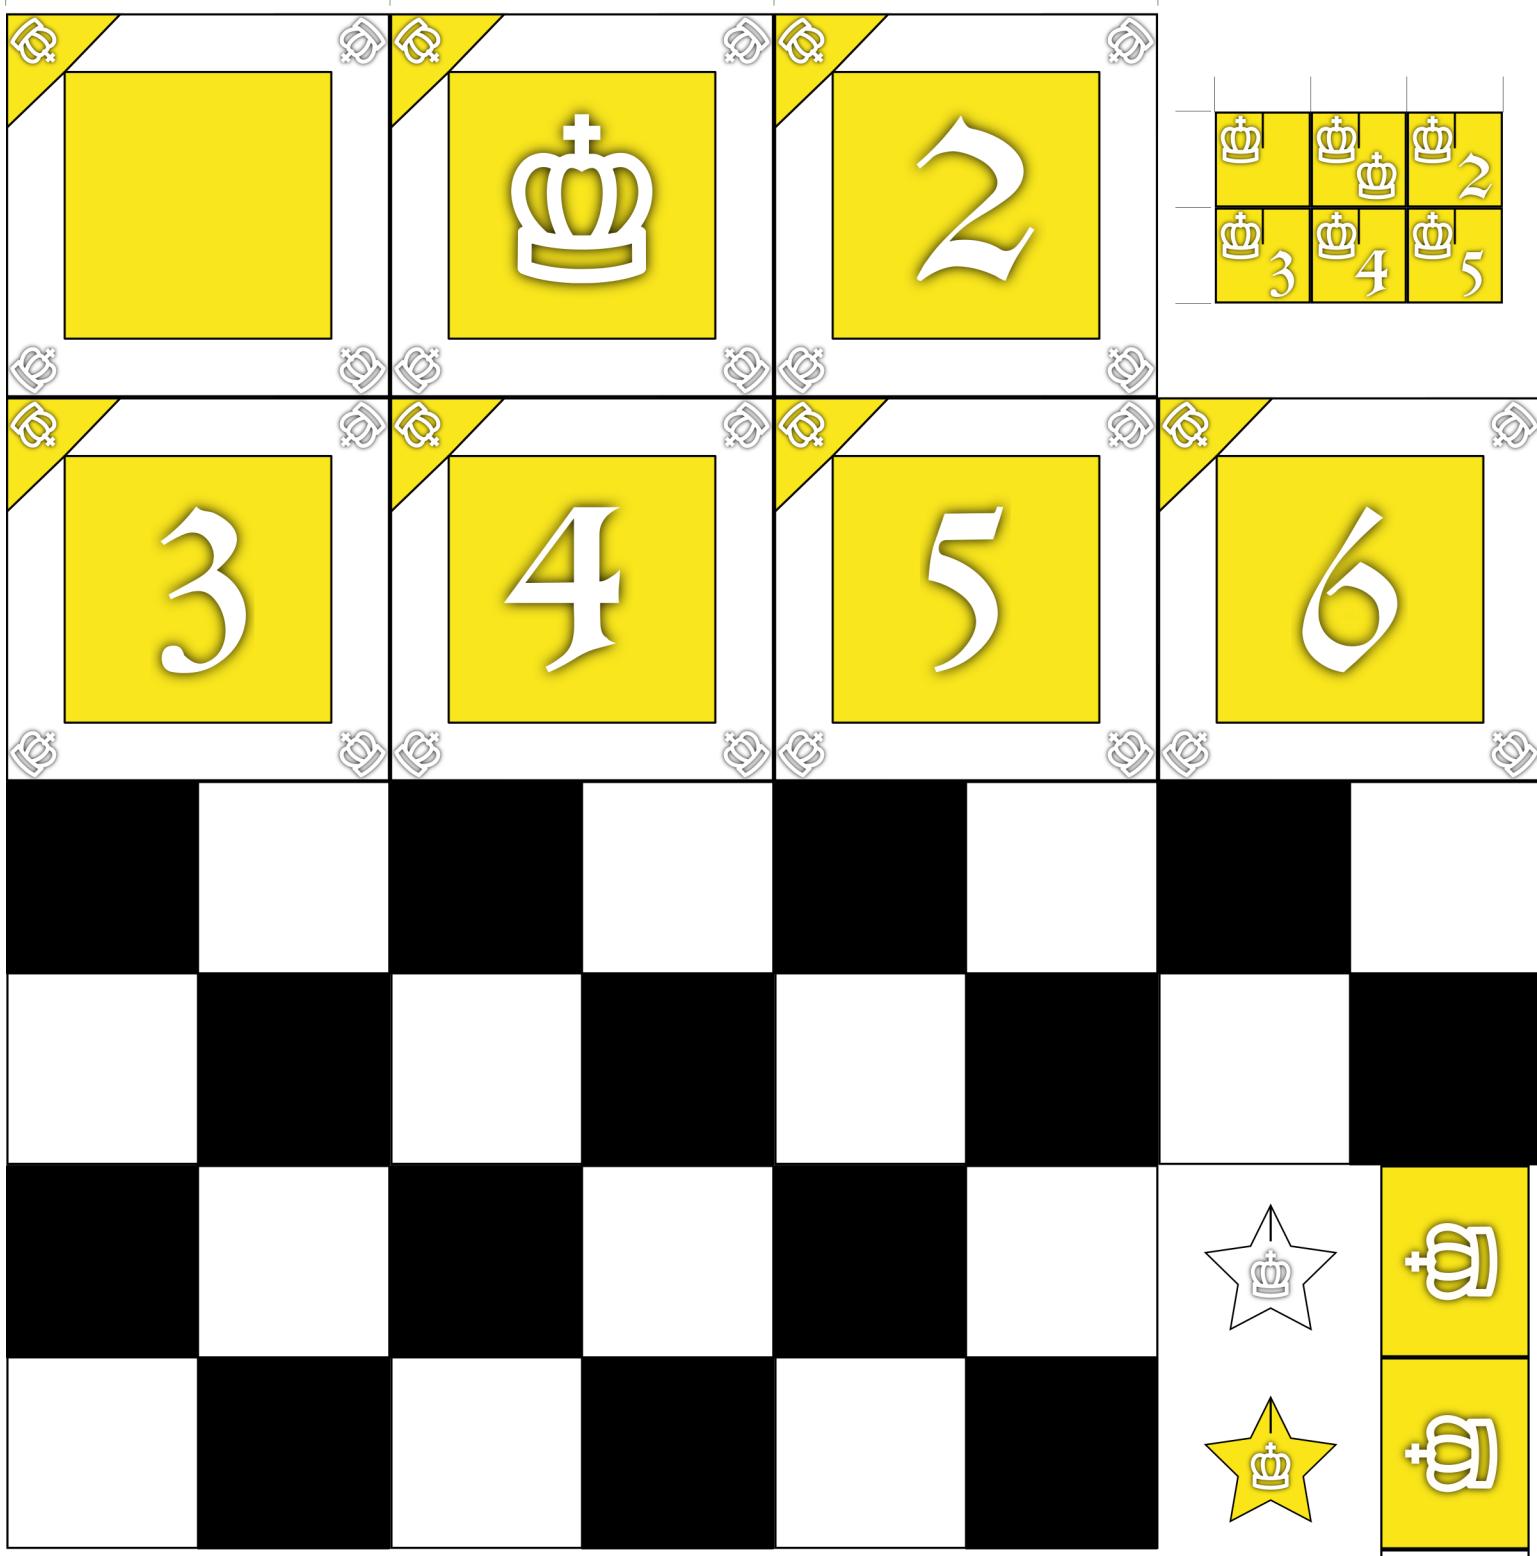

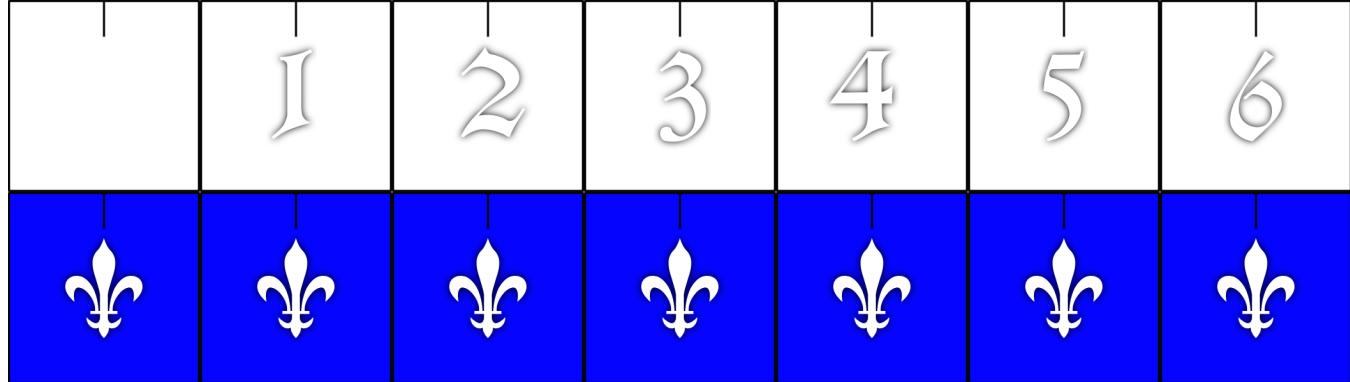

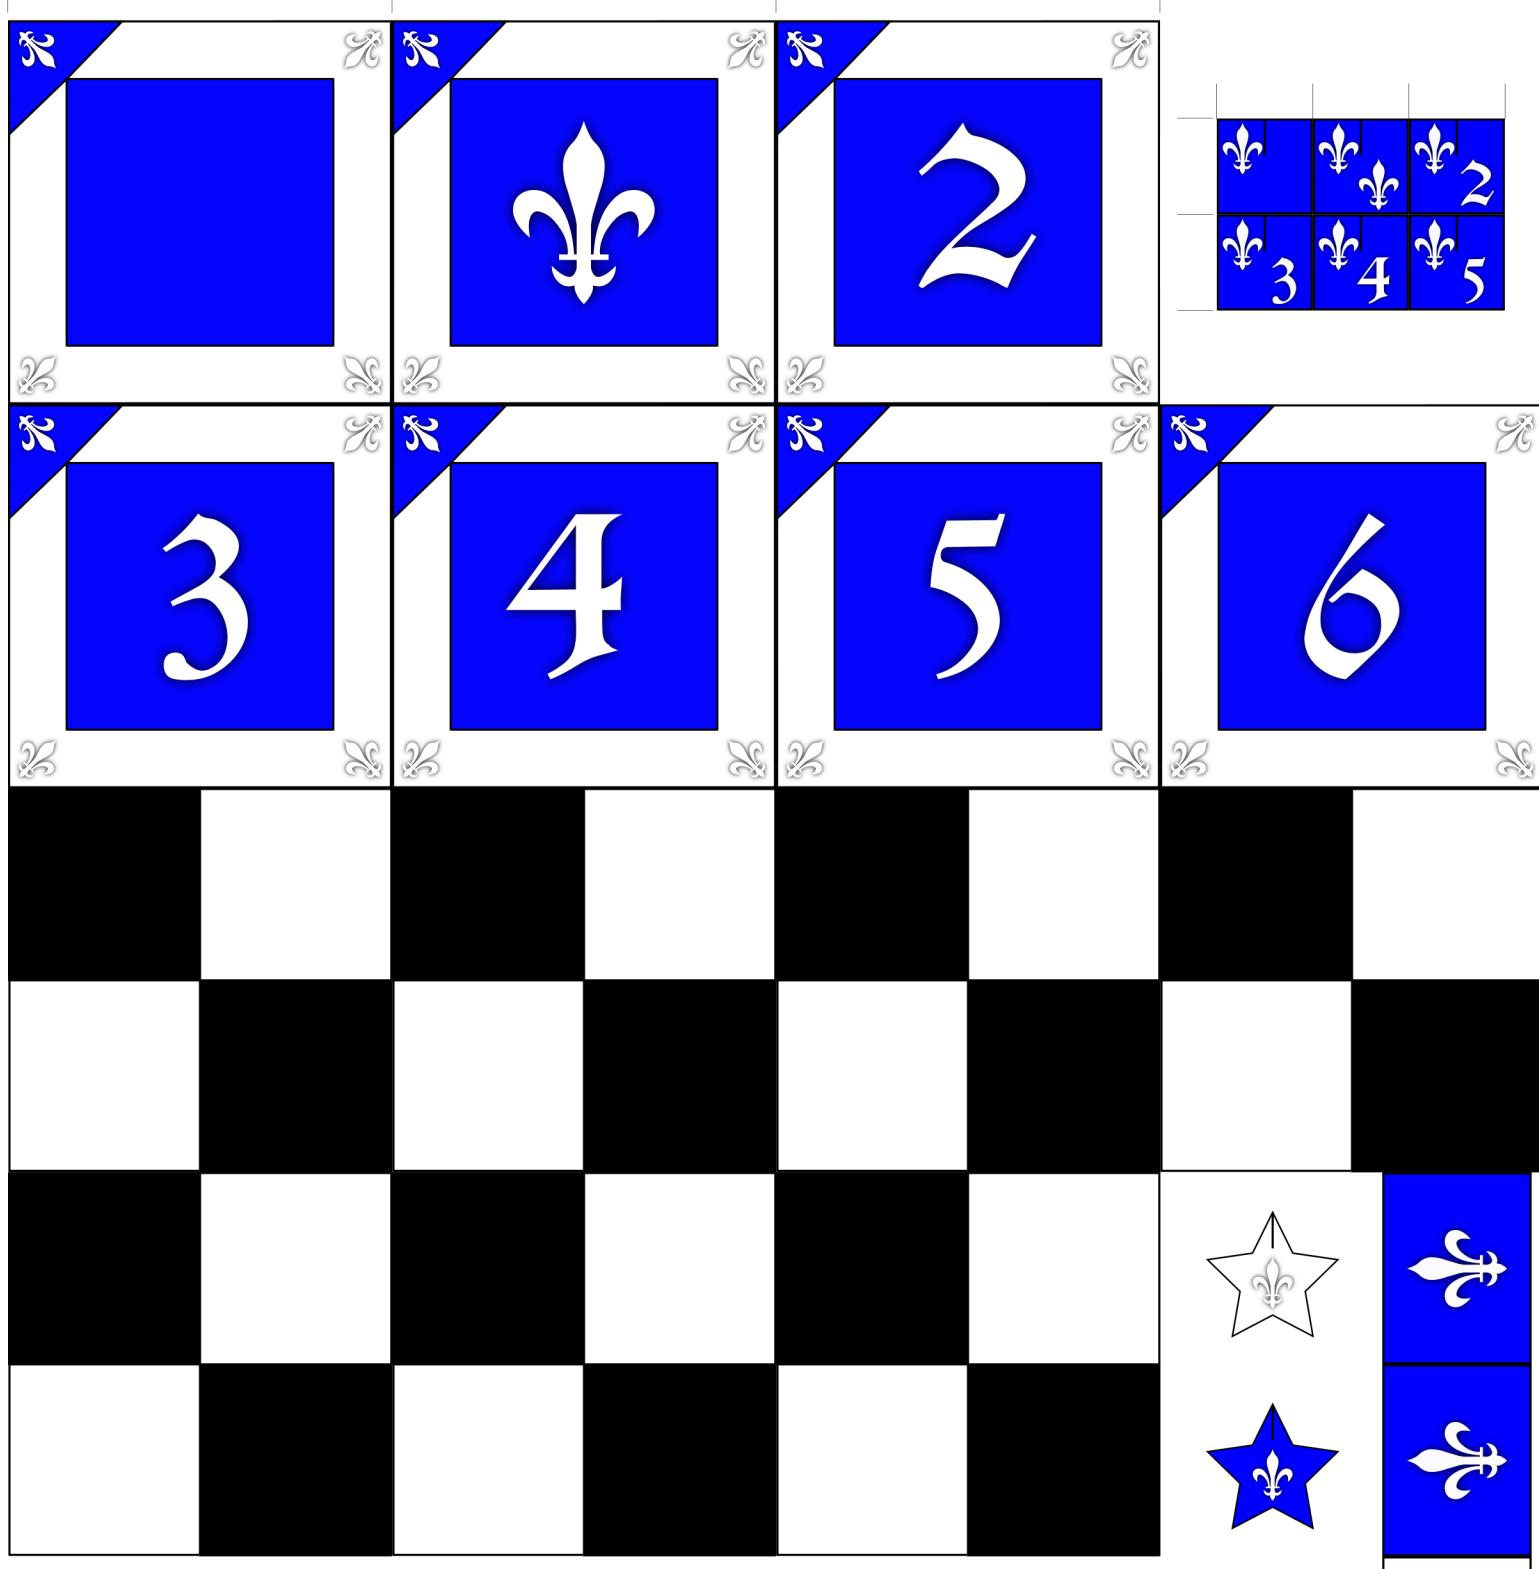

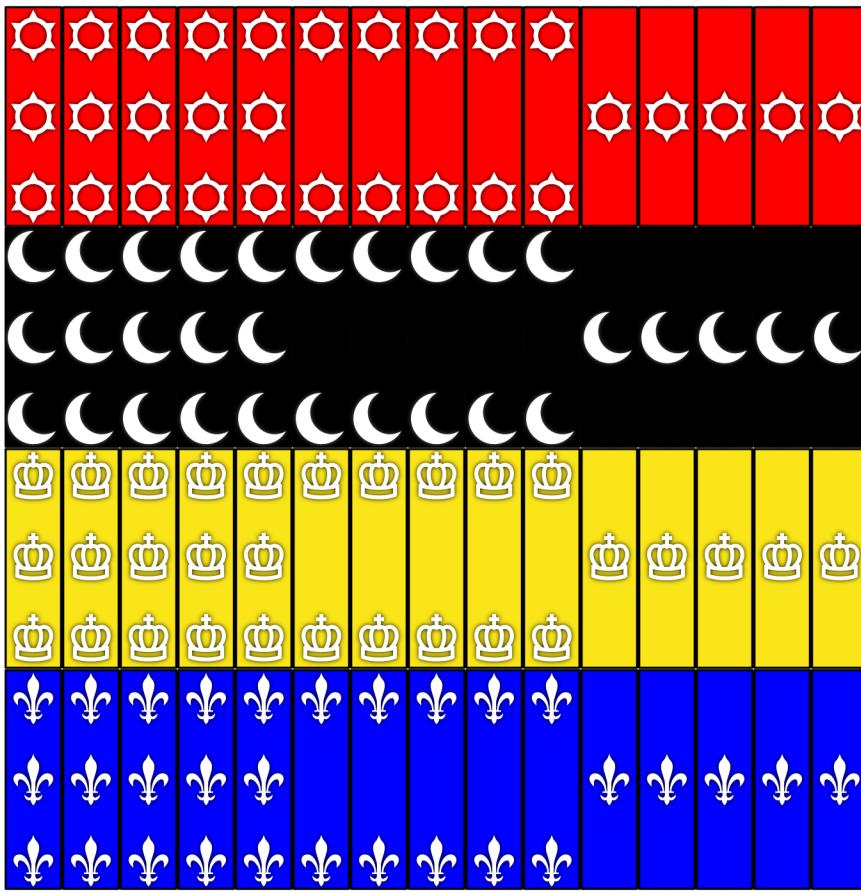

this is an experimental addon for the
hexpack system
